

Vocollect A720 & A710 Mobile Devices

Today's distribution center (DC) requires solutions that optimize operations and provide business flexibility, while maximizing existing technology investments. That is why Honeywell Vocollect™ voice solutions are the performance choice for more than one million workers around the world each day. Empowering mobile workers to operate hands free with voice technology has been proven to offer positive worker productivity and business value.

Within the Vocollect A700 Series from Honeywell, the first-of-its-kind Vocollect A730 mobile device offers combined voice and scanning. Two additional device options within the A700 Series offer customers the best and most cost-effective fit for their particular needs: the Vocollect A720 and A710 mobile devices.

The Vocollect A720 mobile device has two industrial-grade breakaway TCO connectors, identical to those used on prior Vocollect devices. This is the best solution for customers who prefer a Vocollect A700 Series solution that includes support for both wireless and wired Vocollect headsets and certified wired peripherals.

The Vocollect A710 is a wireless-only device that is the best fit for voice-only workflows in environments where operators are using Vocollect Bluetooth®-enabled headsets and peripherals. This device is also ideal for vehicle-based workflows.

Honeywell understands that every customer has unique requirements for the warehouse and distribution center. Offering a wide choice of device and solution options is yet another example of how Honeywell can help you run a better business with voice.

FEATURES & BENEFITS

Empowering mobile workers to operate hands free with voice technology has been proven to offer positive worker productivity and business value.

With two TCO connectors, the Vocollect A720 mobile device is the best solution for customers who prefer a device with support for both wireless and wired Vocollect headsets and certified wired peripherals.

The Vocollect A710 wireless-only device is the best fit for voice-only workflows in environments where operators are using Vocollect Bluetooth-enabled headsets and peripherals. This device is also ideal for vehicle-based workflows.

Both devices offer a choice of two battery options: a standard battery, projected to last 14 hours, and an extended life battery, projected to last 24 hours (a nice option for freezer environments). Either choice helps eliminate work stoppage associated with battery changes.

Both devices support a number of time-saving features, including TouchConnect™, TouchConfig™, RapidStart™ and other features designed for faster start-up times, resulting in greater worker productivity.
